

**MANUAL
FOR
ASPHALT PAVEMENT**

1989

JAPAN ROAD ASSOCIATION

Table of Contents

Chapter 1	Introduction	1
1-1	General Description of Japan	1
1-1-1	General.....	1
1-1-2	Topography.....	1
1-1-3	Climate.....	2
1-1-4	Population	5
1-1-5	Economy and Road Traffic in Japan	6
1-2	Roadways in Japan	10
1-2-1	General.....	10
1-2-2	Roadways and Their Control Organization.....	10
1-2-3	Amount of Investment for Road Improvement and Future Extension	12
1-2-4	Road Structure Ordinance.....	15
1-3	General Description of Pavement.....	20
1-3-1	General.....	20
1-3-2	Pavement Type	20
1-3-3	Actual Condition of Pavement	21
Chapter 2	Structural Design	24
2-1	Design of Asphalt Pavement for General Traffic	24
2-1-1	General.....	24
2-1-2	Pavement Structure	24
2-1-2-1	General.....	24
2-1-2-2	Subgrade	25
2-1-2-3	Base and Subbase Courses	25
2-1-2-4	Binder Course.....	27
2-1-2-5	Surface Course.....	28
2-1-2-6	Shoulder, Center Strip and Marginal Strip	28
2-1-3	Design Method	29
2-1-3-1	General.....	29
2-1-3-2	Classification of Roadways by Traffic Flow Volume.....	30

2-1-3-3	Design CBR Value	30
2-1-3-4	Depth of Frost Penetration	38
2-1-3-5	Design of Pavement Thickness	39
2-1-3-6	Determination of Pavement Structure	41
2-1-3-7	Design Examples	43
2-1-3-8	Pavement on Weak Subgrade	46
2-1-4	Drainage	50
2-1-4-1	General.....	50
2-1-4-2	Surface Drainage.....	50
2-1-4-3	Subsurface Drainage	51
2-1-4-4	Drainage During Construction.....	51
2-2	Design of Asphalt Pavement for Light Traffic	52
2-2-1	General.....	52
2-2-2	Pavement Structure	52
2-2-2-1	General.....	52
2-2-2-2	Subgrade	52
2-2-2-3	Base and Subbase Courses	53
2-2-2-4	Surface Course.....	54
2-2-3	Design Method	55
2-2-3-1	General.....	55
2-2-3-2	Design CBR Value	55
2-2-3-3	Depth of Frost Penetration	55
2-2-3-4	Thickness Design of the Pavement	55
2-2-3-5	Thickness of Individual Layers	57
2-2-4	Drainage	59
Chapter 3	Materials	60
3-1	General.....	60
3-2	Bituminous Materials	60
3-2-1	General.....	60
3-2-2	Petroleum Asphalt.....	61
3-2-3	Emulsified Asphalt	63
3-2-4	Cut-back Asphalt	63
3-2-5	Modified Asphalts	63
3-3	Aggregate.....	70
3-3-1	General.....	70
3-3-2	Crushed Stone	70

3-3-3	Crushed Gravel	73
3-3-4	Gravel.....	73
3-3-5	Sand	73
3-3-6	Filler	74
3-3-7	Slag	75
3-3-8	Special Aggregate	77
3-4	Additives for Stabilization	78
3-4-1	General.....	78
3-4-2	Cement.....	78
3-4-3	Lime	79
Chapter 4 Construction		80
4-1	General.....	80
4-2	Subgrade	81
4-2-1	General.....	81
4-2-2	Ordinary Subgrade	81
4-2-3	Weak Subgrade	81
4-2-3-1	General.....	81
4-2-3-2	Embankment Method Using Quality Soils	82
4-2-3-3	Soil Replacement Method	82
4-2-3-4	Stabilization Method.....	83
4-2-3-5	Sandwich Method	86
4-2-4	Filter Layer	87
4-2-5	Frost Blanket	87
4-3	Subbase Course	87
4-3-1	General.....	87
4-3-2	Construction Using Granular Materials	88
4-3-3	Cement Stabilization Method	89
4-3-4	Lime Stabilization	92
4-4	Base Course.....	93
4-4-1	General.....	93
4-4-2	Mechanical Stabilization	93
4-4-3	Hot Mixing Bituminous Stabilization	96
4-4-4	Cold Mixing Bituminous Stabilization Method	98
4-4-5	Cement Stabilization Method	104
4-4-6	Lime Stabilization Method	105
4-4-7	Penetration Macadam Method	105

4-4-8	Macadam Road Construction Method	107
4-4-9	Crusher-run Method	109
4-5	Surface and Binder Courses	110
4-5-1	General.....	110
4-5-2	Bituminous Mixture by the Hot Mixing Method	110
4-5-2-1	General.....	110
4-5-2-2	Mixture Type	110
4-5-2-3	Mix Design	112
4-5-2-4	Mixing and Transportation.....	117
4-5-2-5	Paving	117
4-5-2-6	Spreading	118
4-5-2-7	Compaction	119
4-5-3	Bituminous Mixture by the Cold Mixing Method	120
4-5-3-1	General.....	120
4-5-3-2	Material	120
4-5-3-3	Mix Design	120
4-5-3-4	Mixing	122
4-5-3-5	Paving	123
4-5-4	Penetration Macadam Method	124
4-5-4-1	General.....	124
4-5-4-2	Selection of Material	124
4-5-4-3	Standard Amount of Materials.....	125
4-5-4-4	Construction.....	129
Chapter 5 Quality Control and Inspection		132
5-1	General.....	132
5-2	Quality Control and Inspection of Asphalt Pavement for General Traffic.....	132
5-2-1	Preliminary Tests	132
5-2-1-1	Base Course Materials (excluding bituminous treated base course)	133
5-2-1-2	Asphalt Mixture (including bituminous treated base course)	133
5-2-1-3	Asphalt Plant	136
5-2-2	Trial Construction	137
5-2-2-1	Trial Mixing	137
5-2-2-2	Trial Paving	137

5-2-3	Control of Quality and Workmanship.....	137
5-2-3-1	Control of Workmanship	138
5-2-3-2	Quality Control	140
5-2-4	Inspection	145
5-2-4-1	General.....	145
5-2-4-2	Methods of Inspection.....	146
5-3	Quality Control and Inspection of Asphalt Pavement for Light Traffic	152
5-3-1	Preliminary Test	152
5-3-2	Quality Control and Inspection	153
Chapter 6 Maintenance and Repair.....		156
6-1	General.....	156
6-2	Regime of Maintenance and Repair	156
6-3	Damage to Asphalt Pavement.....	157
6-4	Investigation of the Road Surface	162
6-5	Evaluation of the Road Surface	166
6-6	Selection of Maintenance and Repair Process	168
6-6-1	Maintenance Methods	168
6-6-2	Repair Methods	168
6-7	Maintenance Management System	178
6-7-1	General.....	178
6-7-2	Data Necessary for a Pavement Maintenance Management System	178
6-7-3	Pavement Investigation	180
6-7-4	Pavement Evaluation	180
6-7-5	Projection of the Long-term Serviceability of the Pavement	181
6-7-6	Repair Method Selection	181
APPENDIX		183
