

# Japan Expressway International Co., Ltd. (JEXWAY)

**Japan Expressway International Co., Ltd. (JEXWAY) provides technology and know-how for expressway projects.**

Japan Expressway International Co., Ltd. (JEXWAY) was established by five Japanese expressway companies. We integrate and utilize the advanced technologies and expertise of these companies, and develop expressway projects mainly focusing on Asian countries in collaboration with our partners. We are now preparing to invest in several prospective projects utilizing Japanese public funds.

Facing a wide range of geographical challenges and weather conditions, Japan's expressway companies have been professionally managing all aspects of expressways. They have been effectively dealing with construction, operation and maintenance, as well as rest area business with their technology and know-how acquired through their professional experience over a half century.
